After spending his life hunting rogue werewolves, Trey Williams is looking forward to a quiet retirement in Haven, Alabama. But between hunting for the local rogue wolf and claiming his newfound mate, Tara Burke, that

peace doesn't last long. Can he find the mysterious werewolf before it endangers his new mate? Tara knows all about werewolves and she doesn't want one, thank you very much, but there's no denying the heat that flares between her and Trey. Can she use her gift for witchcraft to break the bond between them? And does she really want to? A startling history of the forlorn war between the Weather Underground and the FBI, based on interviews and 30,000 pages of previously unreleased FBI documents In the summer of 1970 and for years after, photos of Bill Ayers, Bernadine Dohrn, Jeff Jones, and other members of the Weather Underground were emblazoned on FBI wanted posters. In *Bad Moon Rising*, Arthur Eckstein details how Weather began to engage in serious, ideologically driven, nationally coordinated political violence and how the FBI attempted to monitor, block, and capture its members—and failed. Eckstein further shows that the FBI ordered its informants inside Students for a

Democratic Society (SDS) to support the faction that became Weather during the tumultuous June 1969 SDS convention, helping to destroy the organization; and that the FBI first underestimated Weather's seriousness, then overestimated its effectiveness, and how Weather outwitted them. Eckstein reveals how an obsessed and panicked President Nixon and his inner circle sought to bypass a cautious J. Edgar Hoover, contributing to the creation of the rogue Plumbers Unit that eventually led to Watergate. THE BEGINNING OF THE END THE BEGINNING OF TOMORROW A WORLD FULL OF STRUGGLE A WORLD FULL OF SORROW IN THE BEGINNING THERE WAS BORN A BRIGHT CHILD WITH A BEAUTIFUL SET OF TEETH AND A BEAUTIFUL SMILE BORN WITH LOVE AND CARRING PARENTS HE WAS THE YOUNGEST OF TWO CHILDREN THE FIRST FAVORING HIS FATHER THE SECOND, FAVORING HIS MOTHER HIS GRANDMOTHER SAID A STAR IS BORN, A STAR IS BORN IF

EVER A CHILD WOULD BE A STAR. “As unique a place in the mystery universe as you will ever find...smooth, unexpected, and memorable. This book is a diamond in the rough.” —Michael Connelly, #1 New York Times bestselling author

A record heat wave suffocates remote rural Wisconsin as the local sheriff tracks down a killer hidden in the depths of the community in this atmospheric, race-to-the-finish mystery by the acclaimed author of the Bad Axe County series. Sheriff Heidi Kick has a dead body on her hands, a homeless young man last seen alive miles from the Bad Axe. Chillingly, the medical examiner confirms what Sheriff Kick has been experiencing in her own reoccurring nightmares of late: the victim was buried alive. As the relentless summer heat bears down and more bodies are discovered, Sheriff Kick also finds herself embroiled in a nasty reelection campaign. These days her detractors call her “Sheriff Mommy”—KICK HER OUT holler the opposition’s campaign signs—and as her family

troubles become public, vicious rumors threaten to sway the electorate and derail her investigation. Enter Vietnam veteran Leroy Fanta, editor-in-chief of the local paper who believes Heidi’s strange case might be tied to a reclusive man writing deranged letters to the opinions section for years. With his heart and liver on their last legs, Fanta drums up his old journalistic instincts in one last effort to help Heidi find a lead in her case, or at least a good story... With simmering tension that sweats off the page, *Bad Moon Rising* infuses newsworthy relevance with a page-turning story of crime in America’s heartland, capturing global issues with startling immediacy while entertaining from start to finish. *The Rise of Wisdom Moon* was composed during the mid-eleventh century by Krishna mishra, an otherwise unknown poet in the service of the Chandella dynasty, whose cultural and religious capital was Khajuraho. The early popularity of Krishna mishra’s work led to its frequent translation into the

vernaculars of both North and South India, and even Persian as well. Famed as providing the enduring model of the allegorical play for all subsequent Sanskrit literature, *The Rise of Wisdom Moon* offers a satirical account of the conquest of the holy city of Benares by Nescience, of the war of liberation waged by the forces of Intuition, and of the freedom of the Inner Man that then follows the rise of Wisdom. But at the outset, when Nescience still has the upper hand, with minions like Lord Lust, such developments seem unlikely. Optioned for TV by CBS in a massive deal, Ian McDonald's *Luna* trilogy has already been acclaimed as one of the most exciting and important SF series of the decade. This is Kim Stanley Robinson's *Mars* trilogy for a new generation; perfect SF for fans of *Gravity* and *The Martian* looking for a wider canvas and large-scale thriller format. Akin to the mafia families of *The Godfather*, the families of the five Dragons who control the rich resources of the moon are locked in an endless

and vicious struggle for supremacy and now the peace that reigned while the moon was colonised is breaking down. Which of the scions of the dragons will gain supremacy? Or will the moon, with its harsh vacuum, its freezing dark and blazing, irradiated light be the final winner? A stunning and suspenseful new landscape emerges in the thrilling *Dark-Hunter* world—a world where nothing will ever be the same again. . . Fang Kattalakis isn't just a wolf. He is the brother of two of the most powerful members of the Omegrion: the ruling council that enforces the laws of the Were-Hunters. And when war erupts among the lycanthropes, sides must be chosen. Enemies are forced into shaky alliances. And when the woman Fang loves is accused of betraying her people, her only hope is that Fang believes in her. Yet in order to save her, Fang must break the law of his people and the faith of his brothers. That breach could very well spell the end of both their races and change their world forever. The war is on and time is

running out... In the twenty-first century, the world is on the brink of a scientific renaissance, about to birth a future where space has become privatized and the moon transforms into a fertile commercial ground. As former astronaut Paul Stavenger works to turn a handful of abandoned government moon shelters into a full-fledged moonbase, powerful corporate lobbies align against him. Against the neo-Luddites is Masterson Aerospace, a company funding and creating major scientific breakthroughs. So begins a power struggle that leads to murder and the ultimate conflict over Moonbase. “Ben

Bova is trying to make us grow up . . . Sepharial (1864-1929) had a life-long dislike of luck. He challenged himself to find what he called "scientific rules" that would eliminate chance. And, according to his own accounts, he succeeded. In Law of Values, he suggests buying stocks immediately after they have been clobbered by Saturn, with the price as low as it will get, and then selling the stock immediately after being hit by Jupiter, when the price is likely to be as high as it will ever go. And living off dividends between the two. In The Silver Key, a book on horse-racing, Sepharial examines, and discards, conventional numerology, colours and symbols, in favor of a method based on the Moon, weights and tides. His results are impressive. The Arcana, or Stock and Share Key, was one of a number of secret financial manuscripts which Sepharial sold by subscription only. In it, you will discover the secret to using the Meridian in day trading. Sepharial also gives instructions for using dispositors and decans. This is first time the

Arcana has appeared in print. Astrologers looking to improve their techniques, as well as investors looking to improve their portfolios, will find these books of interest. New Moon Rising is a work of historical fiction, based upon many events in the Persian Gulf during the months prior to and following the fall of Reza Shah Pahlav in 1979. The names of the characters in the story are fictitious, but represent many of the Navy men I sailed with aboard USS LaSalle (AGF-3) from 1978 to 1980. A collection of Black Flame's first three Judge Dredd novels. In Dredd Vs Death, Judge Dredd finds himself up against a plague spreading through Mega-City One, and teams up with Judge Anderson and ex-Judge DeMarco to investigate a trail of carnage by the Death Cult. For the fiftieth anniversary of Sputnik, the behind-the-scenes

story of the fierce battles on earth that launched the superpowers into space. The spy planes were driving Nikita Khrushchev mad. Whenever America wanted to peer inside the Soviet Union, it launched a U-2, which flew too high to be shot down. But Sergei Korolev, Russia's chief rocket designer, had a riposte: an artificial satellite that would orbit the earth and cross American skies at will. On October 4, 1957, the launch of Korolev's satellite, Sputnik, stunned the world. In *Red Moon Rising*, Matthew Brzezinski takes us inside the Kremlin, the White House, secret military facilities, and the halls of Congress to bring to life the Russians and Americans who feared and distrusted their compatriots as much as their superpower rivals. Drawing on original interviews and new documentary sources from both sides of the Cold War divide, he shows how Khrushchev and Dwight Eisenhower were buffeted by crises of their own creation, leaving the door open to ambitious politicians and scientists to squabble over the heavens and the

earth. It is a story rich in the paranoia of the time, with combatants that included two future presidents, survivors of the gulag, corporate chieftains, rehabilitated Nazis, and a general who won the day by refusing to follow orders. Sputnik set in motion events that led not only to the moon landing but also to cell phones, federally guaranteed student loans, and the wireless Internet. *Red Moon Rising* recounts the true story of the birth of the space age in dramatic detail, bringing it to life as never before. In Astrological terms, the prenatal epoch starts at the moment of conception. According to the author, "the prenatal epoch is a certain moment of time, occurring approximately at the commencement of the gestative period... when the degree ascending on the eastern horizon, and the longitude of the moon thereat, interchange with the longitude of the moon and the degree ascending at birth, or their respective opposite points." (pg. 19) What this means is that your prenatal moon was your birth

ascendant, and your prenatal ascendant is your birth moon, or the opposite points in the zodiac. There are four possibilities: If the natal moon is above or below the horizon at birth, and if it is increasing or decreasing in light. So what good is this? For one thing, it helps explain infant abnormalities, as well as infant mortality, in cases where there are no other astrological factors. It also aids in reading charts for multiple births: Twins, triplets, quads and quints. Closely allied to the Prenatal Epoch is the Law of Polarity, or sex. Properly calculated, the Prenatal Epoch will not only confirm the sex of the individual, it will also serve to rectify the birth-time itself. Unlike other methods of rectification, where absurdly large time changes can result, Prenatal Epoch calculations correct minor errors in clock-time, thus enabling greater precision in forecasting. Indigo Marsh had things all planned until a lawyer friend asked him to collect some money from a low life client who happened to work for a local drug lord

named Tony Dee. Enlisting the help of his friend, Dillon St. James, getting the money was like taking candy from a baby until Tony Dee came to Marsh's house to get the money back. After breaking Dee into little pieces Marsh figured he could get on with his life. He had tickets to the opening day of the Atlanta Braves opening day of spring training and he didn't plan on missing it. Even when one of the richest men in the world came calling and money was no object. The plan was simple. Lock up everything and head to Orlando with his pal, B.K., his ninety pound boxer. It was a Friday when she walked in and asked him to find Liz Steele the wife of their star player, Sonny Steele. The answer was still no. Then he met Anna Sue Parker and well, the Braves would have to wait. That was before he found trouble knocking on his door in the form of the missing woman he had been hired to find. It was too easy. Like a Greek bearing gifts, she four problems in the form of drugs, gold treasure, a mysterious key and money. Bad

combinations for Marsh in his line of business, but he made the decision not to get involved and to send her to new client that had hired him to find her until she went missing again. This time Marsh feared she was missing for good until he found out she wasn't the real Liz Steele. Sensing things weren't right Marsh decided it was time to talk to Sonny Steele, except Marsh had a problem. Steele was dead and he was now a person of interest. Marsh now had to get on the move. Traveling to Sea Island just off the coast of Georgia, he found more problems than solutions. It seemed Steele, along with his wife, was making sex videos in his home which was all but abandoned. Showing the picture of Liz Steele to a local party girl that St. James knew, Marsh learned that it was a picture of a different person entirely and she lived on the island. Learning that the woman's name was Cristie Luck, Marsh talks to her and learns that Liz had a twin sister. So who came to his house was the question of the day. Figuring that his client

wasn't telling him everything there was to know, he meets up with his old boss from his days at the National Security Administration, Alexander Nomad, who wants to recruit him back into his old unit. It seems that Nomad is looking for Liz Steele too, but he knows her as Amanda Hartnett and she was supposed to be in a witness protection program except for the fact that an incompetent agent by the name of Chuck Jinks, put the wrong person in the program. It seemed Hartnett had a twin sister and he mistakenly put her in instead. Marsh had little use for Jinks and said that he wouldn't work with him. To clear his mind, Marsh decides to head home and spend some time off the grid. Except a voodoo queen by the name of Queen Alhambra showed up at his office requesting his services to help her save her island home from some greedy real estate investors, one of whom is T.J. Bright, the man Marsh is working for. Still, in for a penny, in for a pound, Steele and St. James go visit the Queen at her island home where Marsh

learns that the key he got from the phony Liz was a bus locker key. After securing the contents of the locker he learns that it is a set of formulas for the synthesizing of artificial cocaine. Suddenly Marsh is being chased by some cocaine cowboys, the DEA, NSA and State and local police. Rushing back to Atlanta, he turns over what he has to Cart Jones, head of detectives on the Atlanta PD. Before he can make it back to his house he is kidnapped, beaten and left for dead. They should have killed him. Now Indigo Marsh angry and when he is angry he is at his dangerous best. In "A Full Moon Rising . . . and the Tao of Menopause," Kimberly Quinn Smith very humorously tells the tale of entering into the new stage of mid-life, while associating hormonal moments with the lunar schedule and her symbolic metamorphosis into a menopausal werewolf. Throughout her journey she flashes back to her colorful 70's childhood, where she grew up in the eclectic town of New Paltz, New York, a small town just an hour

outside of Manhattan. She then brings us back through her early motherhood years and lands us where she resides currently, with a house full of teenagers. Throughout her tale, she makes intermittent, contemplative reflections on her halfway-ness and explores strategies of how to learn to embrace the Principles of the Tao of Menopause. everything for the sake of a once-in-a-lifetime romance? America's sudden entrance into World War II in 1941 became the critical impetus for the development of the first central intelligence agency in American history. President Roosevelt appointed General William Donovan as its creator and under his skills, the Office of Strategic Services quickly covered the globe. But the demands of that cataclysmic conflict were also the force that thrust America's women into roles heretofore unaccepted in a society known as a man's world. From America to Europe, *New Moon Rising*, book III in the series *Company of Spies*, continues to portray not only the daring missions of the men but also those of the women who served alongside them as O.S.S. operatives in that secret clandestine skullduggery world of espionage. Well known as a master storyteller, Dr. Margaret Emanuelson draws from her past experiences as a clinical, forensic psychologist and veteran of the O.S.S. to relate her tales of the audacious and heroic exploits of

O.S.S. operatives, and weaves her characters in and out of each others lives in this fascinating, riveting, fast-moving story of espionage, political intrigue, murder, treason, deceit, patriotism, love, and the overcoming power of people of faith in a World at War. 'UN Secretary-General Ban Ki-moon has called Climate Change "the defining issue of our era". It presents international law and lawyers with a wide range of novel issues, practical as well as conceptual. These challenges are addressed in this volume with great authority by many of the leading international law scholars of our generation. It is an important and distinctive contribution to the burgeoning literature on an issue critical for the future of our planet.' - David Freestone, George Washington University, US Climate change will fundamentally affect

every area of human endeavour, including the development of international law. This book maps the current and potential impacts of climate change on the norms, principles, rules and processes of international law. This timely study brings together a group of leading scholars in their respective fields of international law to examine the impacts of climate change, and our responses to it, on the whole spectrum of international legal regimes, including those dealing with everything from climate displacement, human rights, and international trade and investment, to the oceans, the environment, armed conflicts and the use of force, and outer-space. The volume also examines the impacts of climate change on the underlying principles and processes of international law including those relating to the making and enforcement of international law and to third party dispute resolution. The book shows that there is much more to dealing with climate change than negotiating one global

climate change-specific regime. Other areas of international law can, and must, be included in the solution. In this way international law can maximise its coherence and its efficacy. This well-documented study will appeal to international lawyers, academics, policy makers, government employees, negotiators, practitioners, international legal theorists and anyone interested in climate change and how to maximise our international legal and policy responses to it.
