Estonia is regarded by many as one of the most hopeful cases for the integration of eastern Europe into the enlarged European Union. It provides positive examples of how the integration process can be well handled, but at the same time some of the contentious issues this can give rise to. This book assesses the tensions involved in the development of the Estonian economy in terms of growth, convergence, financial development, labour reallocation, structural and organizational change, and the role of foreign companies and international networks. The analysis of Estonia is placed within a broader context and among a wider set of nations, and thus aims at understanding the potential for growth and structural change in the eastern part of the enlarged EU. In these and related fields, the book seeks to draw lessons from Estonia for other new (and indeed future) EU accession countries. These final chapters in the book of Genesis describe for us the character and personalities of the twelve sons of Jacob. I don't think I'm being overly dramatic when I say: these twelve sons were the future of the world. From these twelve sons and their sons and daughters, and their sons and daughters, and their sons and daughters... would come the leaders and sustainers of the Jewish nation. That nation would fight to survive in a harsh world, fall on their faces often, love their God, and more often than not disobey that same God, claim victories, limp away from failures, and still survive to deliver to all of us the Savior of the world. And, as if that was not enough, they also will outlive all the enemies thrown at them in our future...and they will be gazing up into the heavenlies, eyes full of tears, fully forgiven and righteous, hearts overflowing with faith and joy when He returns - that He may be glorified. The effectiveness of sanctions cannot purely be measured by the way they change the behaviour of their intended target. The degree to which sanctions constrain a rogue state's behaviour and the signals they send to future targets should also be prime considerations. In this thought provoking book Francesco Giumelli measures the true effectiveness of EU sanctions against a range of states including Belarus, Zimbabwe, Moldova, Uzbekistan, the USA and China. He demonstrates that focussing purely on behavioural change is limiting, especially when considering the actions and motivations of an international organisation, and develops a process to evaluate the direct and indirect impact of EU sanctions. Giumelli demonstrates the many different ways sanctions have been used by the EU to produce positive direct and indirect results and provides a multi-level framework to assess the success of sanctions in the future.
