Epidemic trend analysis, timeline progression, prediction, and recommendation are critical for initiating effective public health control strategies, and AI and data analytics play an important role in epidemiology, diagnostic, and clinical fronts. The focus of this

book is data analytics for COVID-19, which includes an overview of COVID-19 in terms of epidemic/pandemic, data processing and knowledge extraction. Data sources, storage and platforms are discussed along with discussions on data models, their performance, different big data techniques, tools and technologies. This book also addresses the challenges in applying analytics to pandemic scenarios, case studies and control strategies. Aimed at Data Analysts, Epidemiologists and associated researchers, this book: discusses challenges of AI model for big data analytics in pandemic scenarios; explains how different big data analytics techniques can be implemented; provides a set of recommendations to minimize infection rate of COVID-19; summarizes various techniques of data processing and knowledge extraction; enables users to understand big data analytics techniques required for prediction purposes. This book is written in a simple and easy-to-understand language to explain the fundamental concepts of the subject. The book presents the subject of EMI in a comprehensive manner to the students at undergraduate level. This book not only covers the entire scope of the subject but also explains the philosophy of the subject. This makes the understanding of the subject more clear and interesting. The book will be very useful not only to the students but also to the faculty members. Any suggestions for the improvement of the book will be acknowledged and well appreciated. Engineering Education has emerged as a fast developing 'discipline' in itself with universities across the world opening up exclusive 'Departments of Engineering Education' which is also impacting the socio-economic system in India. Most of the engineering institutions in India are part of the 'hub-and-

spoke' university education system unique to India. Scientifically developing the 'Outcome-based Curriculum' (OBC) uniformly across India has been a daunting task, due to the dearth of an authentic book on OBC addressing the need of the Indian Engineering Education System. This being the first book of its kind in India and with OBC serving as the 'Constitution' of 'Outcome-based Education' (OBE), it will go a long way to address this need. The unique feature of this book is that it is replete with examples to explain the various concepts of planning, designing and implementing the OBC in engineering institutions. Different aspects of Outcome-based Teaching Learning (OBTL) and Outcome-based Assessment (OBA) are also discussed vividly. Apart from the examples weaved into the lucidly written seven chapters, additional examples and important formats are provided in the 'Annexures'; another unique feature of this book. Every engineering UG, PG, or Diploma teacher would be happy to possess a personal copy of this book for 24x7 access which will help to clear their doubts as it arises then and there. TARGET AUDIENCE • Technical Instruction • Technical Teacher Trainers • Curriculum Specialists/Instructional Designers • Education Policy Makers

What the reviewers' say "The technical education has to adopt Outcome-Based Curriculum and there was a dire need of authentic literature which would serve as a base document for scientifically developing OBC. The book reflects the expertise of both the authors who have more than 30 years of experience in industry and academics in designing and implementing different variants of OBC for various technical education programmes. Such a book will serve as a reference for future generations to

avoid 're-inventing the wheel again and again.' —Dr. M.P. Poonia, Vice-Chairman, AICTE "National Institute of Technical Teacher Training and Research (NITTTR) Bhopal has been spearheading different forms of OBC for the last five decades in which the authors have contributed substantially. Care has been taken such that this book will not only benefit the Indian engineering education system, but also the engineering teaching fraternity at the international context."—Dr. C. Thangaraj, Director, NITTTR Bhopal

'Het gele behang' (1892) van Charlotte Perkins Gilman is het beklemmende verhaal van een geesteszieke vrouw. Het is een klassiek verhaal binnen de feministische en gothic literatuur, waarin horror en romantiek gecombineerd worden. In 'Het gele behang' stelt Gilman het gebrek aan zeggenschap van vrouwen over hun eigen leven en de weerslag hiervan op hun geestelijk en fysiek welbevinden, in de 19e eeuwse Amerikaanse maatschappij, aan de kaak. Het verhaal vertoont veel raakvlak met Charlotte Perkins Gilman's eigen leven. Na de geboorte van haar dochter onderging ze een postnatale depressie. Ze werd behandeld door, de in het verhaal genoemde arts, Weir Mitchell. Hij schreef haar een rustkuur voor: "een zo huiselijk mogelijk leven, zonder potlood, pen en penseel." I am glad to present the book entitled "Mobile and Wireless Communication" for Third Year (Sixth Semester) Diploma in Electronics Engineering as per SBTE's New Revised syllabus. I have observed the students facing extreme difficulties in understanding the basic principles and fundamental concepts. To meet this basic requirement of students, sincere efforts have been made to present the subject matter with frequent use of figures. "Epidemic trend analysis, timeline progression,

en vooral intense geluk leidde. In Geluk staat je goed vertelt Tina Turner openhartig over haar eigen spirituele ontdekkingsreis en hoe deze tot persoonlijke groei, enorme succes en vooral intense geluk leidde. In deze intieme vertelling deelt Tina de inzichten die haar leven veranderden en hoe het boeddhisme haar steun en toeverlaat werd. Tegelijkertijd inspireert ze de lezer aan de hand van tijdloze principes uit het boeddhisme zelf ook geluk te omarmen – iets dat voor iedereen ongeacht hun omstandigheden mogelijk is. Tina Turner worden we misschien nooit – maar met deze krachtige inzichten kunnen we wel net zo stralend in het leven staan als zij. Tina Turner bewijst in dit boek dat ze veel meer dan een rockster is. Ze is een inspiratie die laat zien dat geluk van iedereen is.

Eén op de drie Nederlanders zit wel eens op de bank bij een psycholoog – en sommige van deze patiënten zijn zélf therapeut, zoals Lori Gottlieb. In Misschien moet je eens met iemand praten? beschrijft ze sessies in haar spreekkamer met uiteenlopende patiënten als een pasgetrouwd stel dat moet omgaan met een dodelijke ziekte, een man met zelfmoordneigingen en een vrouw die telkens relaties begint met verkeerde mannen – maar ook de therapie die ze zelf volgt. Want naast psycholoog is Gottlieb allereerst mens, die worstelt met relatieproblemen en het opvoeden van haar zoon. Met humor, wijsheid en empathie gaat ze in op essentiële levensvragen over verlangens en behoeften, leegtes en betekenis, schuldgevoelens en opluchting, eenzaamheid en liefde. ‘Ik werd meteen verliefd op

dit boek. Gottlieb neemt ons mee naar het hart van haar therapeutische sessies met patiënten, én die van haarzelf. Als je ook maar een beetje geïnteresseerd bent in het therapeutische proces, of in het mens-zijn, móet je dit boek lezen. Het is wijs, warm, slim en grappig.’ – Susan Cain ‘Lori Gottlieb neemt ons mee in de intiemste confrontaties en laat ons achter met een verrassend frisse blik op onszelf, de ander, en de menselijke aard. Het boek is grappig, hoopgevend, wijs en fascinerend – en dat alles tegelijkertijd.’ – Arianna Huffington In this book, Author discuss the whole case of Financial Management for the Nagpur Improvement Trust.
