**what is disc brake parts working and diagram**  
Dec 16 2019 web a disc brake is a type of brake that  
uses the calipers to squeeze pairs of pads against a  
disc or a rotor to create friction this action slows the  
rotation of a shaft such as a vehicle axle either to  
reduce its rotational speed or to hold it stationary the  
energy of motion is converted into waste heat which  
must be dispersed
