From the thousands of matches ever played by Arsenal, stretching from a muddy field on the Isle of Dogs in the 19th century to the Premier League era and the pristine perfection of the Emirates Stadium, here are 50 of the club's most glorious, epochal and thrilling games of all! Expertly presented in evocative historical context, and described incident-by-incident in atmospheric detail, Arsenal Greatest Games offers a terrace ticket back in time, taking in their first FA Cup win in 1930, 1930s dominance of domestic football under the great Herbert Chapman, through to the great 1971 double-winning side; on to the exploits under George Graham in the late

1980s and early 1990s, and Arsene Wenger's revolution and his all-conquering invincibles of 2004. An irresistible cast list of club legends - Frank McLintock, Charlie George, Thierry Henry, Ian Wright, Dennis Bergkamp - comes to life in these thrilling tales of goalscoring feats, great comebacks, Wembley glory and the odd glorious yet crushing disappointment. In all, a journey through the highlights of the Gunners' history which is guaranteed to make any fan's heart swell with pride. The IX Olympiad, the ninth volume in The Olympic Century series, begins by exploring the Summer Games of Amsterdam, 1928, the first to feature the Olympic flame as well as the first to include track and field and gymnastics competitions for women. Well established as the world's greatest festival of sport, the Olympic Games rose to new heights in Amsterdam. The book tells the story of Olympic heroes like Paavo Nurmi, the legendary Finnish distance runner, who claimed one more gold medal in 1928 to take his personal total to nine from three Olympics; and the Canadian sprinter Percy Williams, who claimed the title of world's fastest man with golds in both the 100- and 200-metres. Amsterdam also saw the triumph of triple-jumper Mikio Oda of Japan, who became the first gold medalist from Asia; and American double-gold swimmer Johnny Weismuller, who would go on to star in Hollywood as Tarzan the Ape Man. Following the Amsterdam Games, the focus turns to Lake Placid, N.Y., and the Winter Games of 1932. The book tells the story of athletes like American speed-skater Irving Jaffee, who lunged for gold in a thrilling photo finish in the 10,000-metres; Sonja Henie of Sweden, who would claim her second of three consecutive figure skating titles; and American Eddie Eagan, who would add a team gold in four-man bobsleigh to his gold in boxing won in the Antwerp Olympics 12 years earlier. Juan Antonio Samaranch, former President of the International Olympic Committee, called The Olympic Century, "the most comprehensive history of the Olympic games ever published". The occurrence of suicide often startles those who

knew the involved individual. The public often cannot believe that the person who committed suicide could have engaged in such a seemingly irrational and extreme act. Similarly, health agencies often find themselves at a loss as to what strategies or policies might be employed to stem the seemingly constant flow of suicide. This book carefully addresses sociological, psychological, and physiological factors that contribute to suicide. It also presents strategies that might be employed to reduce suicide by way of public policies, psychotherapeutic strategies, and neurophysiological interventions. This book compares two buildings with different technologies and distinct environment from the combined viewpoints of civil engineering and architecture. The first is the most recent building of Columbia University in New York, the Northwest Science Building, a project designed by Rafael Moneo and Dan Brodtkin of Ove Arup. The second one is the Burgo Tower in Oporto, by Eduardo Souto Moura and Rui Furtado of AFA, a building that brings a new perspective to the use of prefabrication technologies with local traditional construction systems. With the detailed analyses of recognized researchers in civil engineering and architecture, this book is a reflection upon the problems and solutions in the design and construction process of a prefabricated building system. This volume, like those to follow, brings together, building research and building design practice to enhance the knowledge of complementarity areas involved in construction, engineering and architecture. This is the first book in a new series "Building Research: Design, Construction and Technologies" which aims to bridge scientific research and professional practice to understand the Building Design problems. In each edition, one or two case studies (recognized buildings in the international design panorama) are analyzed with their authors to assess the design process and the construction development. To understand the problems involved, researchers, engineers and architects, are asked to contribute to this analysis with essays on building

research issues, as building technology, construction management, acoustics, maintenance or prefabrication. This book presents the proceedings of IBEREO 2019. This conference addresses the most recent trends in rheology with a special emphasis on both basic science and industrial applications. Papers presented cover different perspectives, like experimental, theoretical and numerical. Topics include Microfluidics and microrheology, Food, Cosmetics and Pharmaceutical Products; Suspensions and Colloids; Rheometry and Experimental Methods; and Polymers and Biopolymers.

Itinerário pedagógico de iniciação ao sacramento da Eucaristia, com metodologia e conteúdo de acordo com o estilo catecumenal. Com linguagem compreensível, articulando a vivência do encontro com o prazer da descoberta de cada participante, o Livro do Catequizando indica o caminho a seguir para que se possa acompanhar a dinâmica de estudo e de prática celebrativa do sacramento da Eucaristia. Este livro acompanha os temas do Livro do Catequista com o acréscimo dos encontros sobre o querigma e as 5 leituras orantes. Este livro interage com catequese dirigida às famílias por meio do correspondente Livro da Família. O Núcleo de Catequese Paulinas, que elaborou esta obra, é coordenado pelo padre Antonio Francisco Lelo e, para este trabalho, contou com a colaboração do Professor Luiz Alexandre Solano Rossi e a participação de três catequistas experientes: Abadias Aparecida Pereira, Erenice Jesus de Souza e Sandra Alves Silva. As ilustrações são de Gustavo Montebello, venezuelano, formado em artes plásticas pela Universidad Centro Occidental Lisandro Alvarado. No Brasil, realiza trabalhos ligados à liturgia, como pinturas e esculturas, em diversas igrejas. A mistagogia é a arte de sermos iniciados no mistério da Páscoa de Cristo, do qual ganha sentido todos os atos salvadores de sua vida e que são atualizados na celebração da liturgia. A mistagogia promove a unidade entre o anúncio da Palavra, a celebração do Sacramento e a vivência da fé. Leva o batizado a fazer a experiência dos

símbolos e gestos celebrados não apenas como elementos pertencentes a este mundo, mas, aos olhos da fé, como realidades divinas. É necessário ajudar o catequizando a entrar neste mundo de sinais para descobrir o universo simbólico em que se move a liturgia. O método parte do sentido cotidiano do símbolo e, em um segundo nível aponta como este aparece na Bíblia e em seguida mostra como o mesmo é empregado na celebração. Assim, chega-se ao quarto nível: o compromisso cristão que o rito suscita na vida. Não se trata de explicar, mas de experienciar o símbolo, por isso o livro propõe a celebração de vivências que facilitam uma melhor assimilação do acontecimento de graça que se dá na liturgia.

Invertebrates exhibit a wide range of diversity in body plan, physiology, behaviour, adaptation and preferences for habitat and food. Their relationship with the environment is unique and multidimensional. This book is organized into two sections containing chapters on the frontier areas of research in ecophysiology and management-related problems of various invertebrates. Topics covered include hibernation physiology; the amelioration potential of drug and parasitic host response of molluscs; the genetics and biology of hydrocorals; and current trends of management, aquaculture, and harvesting of ecologically and economically important molluscs and sponges. This book is an enriched edition of invertebrate zoology and is a useful source of information for researchers and students in various disciplines. In recent years, a paradigm shift in research on invertebrates has occurred under the backdrop of climate change and environmental contamination. This important shift in the research is well reflected in this book.

In Defense of Liberal Democracy is a clarion call for today's divided time: a bold reaffirmation of the liberal democratic principles that have carried America through each crisis in its history--and can do so again. Merging expert historical, political, and economic analysis, In Defense of Liberal Democracy shows how our recent technological revolution--what high-profile economist Manuel

Hinds calls the Connectivity Revolution--has led to a crisis of divisiveness. Assessing the angry rhetoric and polarization of current political and social discourse in the US, Hinds considers the dangers of seeking populist solutions to our current upheaval and shows how the traditions and institutions of liberal democracy restored prosperity, freedom, and social equity during the Industrial Revolution, the Great Depression, and other periods of political instability. Hinds examines our national past and present (up to and including the 2020 presidential election) to illustrate how current events can be as dramatic as any historical legacy in warning us of the danger of abandoning our democratic principles. According to media reports, Latin America is one of the most violent regions in the world—a distinction it held throughout the twentieth century. The authors of *Violence and Crime in Latin America* contend that perceptions and representations of violence and crime directly impact such behaviors, creating profound consequences for the political and social fabric of Latin American nations. Written by distinguished scholars of Latin American history, sociology, anthropology, and political science, the essays in this volume range from Mexico and Argentina to Colombia and Brazil in the twentieth and twenty-first centuries, addressing such issues as extralegal violence in Mexico, the myth of indigenous criminality in Guatemala, and governments' selective blindness to violent crime in Brazil and Jamaica. The authors in this collection examine not only the social construction and political visibility of violence and crime in Latin America, but the justifications for them as well. Analytically and historically, these essays show how Latin American citizens have sanctioned criminal and violent practices and incorporated them into social relations, everyday practices, and institutional settings. At the same time, the authors explore the power struggles that inform distinctions between illegitimate versus legitimate violence. *Violence and Crime in Latin America* makes a substantive contribution to understanding a key problem facing

Latin America today. In its historical depth and ethnographic reach, this original and thought-provoking volume enhances our understanding of crime and violence throughout the Western Hemisphere. High Value Manufacturing is the result of the 6th International Conference on Advanced Research in Virtual and Rapid Prototyping, held in Leiria, Portugal, October 2013. It contains current contributions to the field of virtual and rapid prototyping (V&RP) and is also focused on promoting better links between industry and academia. This volume comprises a collection of more than 110 reviewed papers which cover a wide range of topics, such as Additive and Nano Manufacturing Technologies, Biomanufacturing, Materials, Rapid Tooling and Manufacturing, CAD and 3D Data Acquisition Technologies, Simulation and Virtual Environments, and novel applications. High Value Manufacturing is intended for engineers, designers and manufacturers who are active in the fields of mechanical, industrial and biomedical engineering. Tourism and its impacts on city life and on the landscape, culture and economy of host countries is the focus of the third issue of *Electra*. Geographer Álvaro Domingues traces the long history of the tourism phenomenon; French urban planner Thierry Paquot defends the disruption of the growing movement of world tourism; António Baião and António Pedro Marques analyse so-called 'ethical tourism'; economist and researcher Álvaro Matias reveals the numbers to examine the impacts of the tourism economy; French sociologist and ethnologist Jean-Didier Urbain discusses the figure of the tourist and the experience of the trip; and architect Pedro Bismarck reflects on the effects of tourism on the contemporary city. This issue's interview features Rosi Braidotti, an Italian-Australian philosopher and author. Italian philosophers Emanuele Coccia and Andrea Cavalletti comment on the definition of goods present in the work *Capital*, and historian José Neves examines the complex inheritance that Marx has left us. In the Diagonal section, biologist and researcher Vasco Barreto and

professor of Portuguese and Brazilian studies Pedro Schacht Pereira analyse the question of race from the viewpoints of science and postcolonial studies. Also in this issue, sculptor Rui Chafes writes about the work of fellow sculptor Manuel Rosa; António Guerreiro profiles Maria Velho da Costa; Catalan poet and essayist José Ángel Cilleruelo examines the history of the kiss within the public space of the city; and Bernardo Carvalho, a Brazilian novelist from Rio de Janeiro, makes an incursion into the 'epileptic city' of São Paulo. We also publish a facsimile of the diary of artist Pedro Cabrita Reis, creator of the cover art for this third issue of *Electra*.

O presente E-book resulta de um colóquio organizado pela Faculdade de Teologia e pela Faculdade de Ciências Humanas da Universidade Católica Portuguesa que decorreu nos dias 23 a 25 de abril de 2017. Centra-se no desejo humano, tema que permite e requer uma abordagem multidisciplinar, mutuamente enriquecedora. Oferece uma visão calidoscópica, cromática e eidética, segundo o prisma, o ajuste ou a perspetiva conceptual a partir da qual é olhada, refletida e praticada. Trata-se de uma abordagem original das dinâmicas do desejo humano a partir de qualificados olhares filosóficos, teológicos, literários e psicológicos.

Deep learning is a branch of machine learning similar to artificial intelligence. The applications of deep learning vary from medical imaging to industrial quality checking, sports, and precision agriculture. This book is divided into two sections. The first section covers deep learning architectures and the second section describes the state of the art of applications based on deep learning.

The Rough Guide to Portugal is the ultimate travel guide to one of the world's most popular holiday destinations. With in-depth coverage to guide you and stunning photography to inspire you, The Rough Guide to Portugal will ensure you make the most of your time in Portugal, whether you plan to relax on the Algarve's vast swathes of golden sand, surf the wave-lashed west coast or hike through the country's unspoilt mountainous interior. Crystal clear maps

help you explore Portugal further, from tracking down fashionable hangouts in Lisbon to discovering the port wine lodges in Porto. Insider reviews reveal the best places to eat, drink and sleep with something for every budget, whether you plan to enjoy the country's pousadas by staying in a stunningly converted monastery or castle, gorge on pastéis de Belém in Lisbon, or sip your way along a wine route in the Alentejo. Make the most of your trip with *The Rough Guide to Portugal*. This best-selling text for introductory Latin American history courses encompasses political and diplomatic theory, class structure and economic organization, culture and religion, and the environment. The integrating framework is the dependency theory, the most popular interpretation of Latin American history, which stresses the economic relationship of Latin American nations to wealthier nations, particularly the United States. Spanning pre-historic times to the present, *A HISTORY OF LATIN AMERICA* takes both a chronological and a nation-by-nation approach, and includes the most recent historical analysis and the most up-to-date scholarship. The Ninth Edition includes expanded coverage of social and cultural history (including music) throughout and increased attention to women, indigenous cultures, and Afro-Latino people assures well balanced coverage of the region's diverse histories. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

A Lei 13.964, publicada no dia 24 de dezembro de 2019, conhecida como Lei Anticrime, alterou substancialmente o Código Penal, Código de Processo Penal e diversas leis extravagantes, como a Lei de Execução Penal, Lei de Crimes Hediondos e tantas outras. Esta obra traz algumas considerações sobre as principais modificações realizadas pela Lei Anticrime. A obra objetiva tensionar os conceitos-ferramentas de Michel Foucault a partir de inquietações que visam esquadriñar as formações discursivas, penetrar nas relações de poder e conduzir, regular e produzir subjetividades. Destarte, os

sujeitos, as instituições e as práticas compõem o escopo analítico das discussões a serem travadas nesta obra. The rise of manufacturing intelligence is fuelling innovation in processes and products concerning a low environmental impact over the product's lifecycle. Sustainable intelligent manufacturing is regarded as a manufacturing paradigm for the 21st century, in the move towards the next generation of manufacturing and processing technologies. The manufacturing industry has reached a turning point in its evolution and new business opportunities are emerging. With sustainable development arises the immense challenge of combining innovative ideas regarding design, materials and products with non-polluting processes and technologies, conserving energy and other natural resources. On the other hand, sustainability has become a key concern for government policies, businesses and the general public. Model cities are embracing novel ecosystems, combining environmental, social and economic issues in more inclusive and integrated frameworks. Green Design, Materials and Manufacturing Processes includes essential research in the field of sustainable intelligent manufacturing and related topics, making a significant contribution to further development of these fields. The volume contains reviewed papers presented at the 2nd International Conference on Sustainable Intelligent Manufacturing, conjointly organized by the Centre for Rapid and Sustainable Product Development, Polytechnic Institute of Leiria, and the Faculty of Architecture, Technical University of Lisbon, both in Portugal. This event was held at the facilities of the Faculty of Architecture, Lisbon, from June 26 to June 29, 2013. A wide range of topics is covered, such as Eco Design and Innovation, Energy Efficiency, Green and Smart Manufacturing, Green Transportation, Life-Cycle Engineering, Renewable Energy Technologies, Reuse and Recycling Techniques, Smart Design, Smart Materials, Sustainable Business Models and Sustainable Construction. Green Design, Materials and Manufacturing Processes is intended

for engineers, architects, designers, economists and manufacturers who are actively engaged in the advancement of science and technology regarding key sustainability issues, leading to more suitable, efficient and sustainable products, materials and processes. 'Do not miss this book' NAOMI KLEIN, author of *This Changes Everything* The history of the nutmeg is one of conquest and exploitation - of both human life and the natural environment - and the origin of our contemporary climate crisis. Tracing the threats to our future to the discovery of the New World and the sea route to the Indian Ocean, *The Nutmeg's Curse* argues that the dynamics of climate change are rooted in a centuries-old geopolitical order constructed by Western colonialism. The story of the nutmeg becomes a parable revealing the ways human history has always been entangled with earthly materials - spices, tea, sugarcane, opium, and fossil fuels. Our crisis, Ghosh shows, is ultimately the result of a mechanistic view of the earth, where nature exists only as a resource for humans to use for our own ends, rather than a force of its own, full of agency and meaning. Writing against the backdrop of the global pandemic and the Black Lives Matter protests, Ghosh frames these historical stories in a way that connects our shared colonial past with the deep inequality we see around us today. By interweaving discussions on everything from the global history of the oil trade to the migrant crisis and the animist spirituality of indigenous communities around the world, *The Nutmeg's Curse* offers a sharp critique of contemporary society and speaks to the profoundly remarkable ways in which human history is shaped by non-human forces.

O terceiro volume de *Redenção e Escatologia* contém a investigação realizada no âmbito de um projeto interdisciplinar sobre os temas da salvação do homem e da consumação do mundo na cultura portuguesa da contemporaneidade. A reflexão do terceiro tomo destaca o inconformismo dos nossos escritores com a ordem social e religiosa de uma época de antagonismo e conflito entre a fé e a

ciência, a espiritualidade e a racionalidade, que inclui a denúncia dos males morais da Igreja e do poder político e inclui a justificação pelas opções do monoteísmo cristão, do politeísmo pagão, do ateísmo, do deísmo, do agnosticismo ou do panteísmo. Apresenta a importância da linguagem poética na experiência da espiritualidade, como meio adequado para dizer a relação do homem com Deus, que já não surge de modo objetivo e evidente, sob as formas dogmáticas de fideísmo ou sob as formas míticas e teosóficas de absoluta imanência, mas apenas se vislumbra na ausência misteriosa de uma silenciosa presença. It shouldn't be that hard, should it? It's just a matter of placing a ball into a goal measuring eight feet high and eight yards wide, with only a six-foot man able to stop you. Yet the humble penalty kick has produced an inordinate amount of drama, trauma, boundless joy and shattered dreams since its invention in the late 19th century. And it is not just England who have suffered at its hands. In *Twelve Yards*, Ben Lyttleton tells the definitive story of the spot-kick - how to take them, how not to miss them, and the different ways that penalty-takers and goalkeepers approach them, both physically and mentally. And everyone has a tale to tell. Why did Roberto Baggio miss in the 1994 World Cup final? How did Petr Cech dive the right way six times running to help Chelsea win the 2012 Champions League final? What would have happened if Antonin Panenka had missed his famous penalty in 1976? And what has John Wayne got to do with penalties? Breaking down the statistical likelihood of scoring to within an inch of its life, while weaving together exclusive anecdotes from legends of the penalty with intriguing revelations by psychologists and sports scientists, this is the book that finally provides the answers to one of football's oldest questions. How do you score from twelve yards? Without a doubt, understanding what we must do to save our home, our planet, and how we are to do it is of the gravest importance for the present generation and the next. Clearly, advances won through space technology and applications of the

same to the study of Earth play an excellent and vital role in classification and interpretation of the processes taking place on the Earth and in space. Today, space technology helps us understand Earth and how we can support and manage its state, to keep it in working condition under the current circumstances. How can we do this? Obviously, we must use appropriate methods and instruments to collect the information we need. In the meantime, it is necessary to develop systems to analyze and process the data collected.

Der Sammelband Philosophie des 20. Jahrhunderts - Wegmarken rundet mit seinen einunddreißig ausgewählten Beiträgen das bereits in den Sammlungen Husserlsche Phänomenologie (erweiterte 2. Aufl. Logos 2016) und Die Philosophie Ernst Cassirers (Meiner 2018) präsentierte - verstreut publizierte oder unpublizierte - philosophische OEuvre des Autors ab. Im Unterschied zu diesen beiden Bänden sind die hier zum Abdruck gebrachten Texte nicht einem einzelnen Sachthema gewidmet, sondern geben - geordnet nach zwölf Abteilungen - unterschiedliche Richtungen der viereinhalb Jahrzehnte währenden philosophischen Arbeit des Autors wieder. Sie umfassen - thematisch vielfach miteinander verbundene - Arbeiten zur Philosophie in Afrika, im Austromarxismus, bei Marx und im Marxismus, in Rußland, zum Neukantianismus, zu Krisisbewußtsein und Kulturkritik, zur Lebensphilosophie, aber auch zu den philosophischen Disziplinen Rechts- und Staatsphilosophie, Theoretische Philosophie sowie Sprachphilosophie. Der Band enthält auch einige Beiträge zu Phänomenologie und Cassirerscher Symbolphilosophie, die in die beiden früheren Sammlungen keinen Eingang gefunden haben. Die vorangestellte Autobiographische Einführung erläutert die Umstände, unter denen die Hinwendung zu der einen oder anderen Thematik erfolgte, wer oder was die Themenfindung und Themenbearbeitung beeinflusst hat, welche Tätigkeitsformen damit verbunden waren.

Since 1824, Bahians have marked independence with a popular festival that contrasts sharply with

the official commemoration of Brazil's independence on 7 September. The Dois de Julho (2 July) festival celebrates the day the Portuguese troops were expelled from Salvador in 1823, the culmination of a year-long war that gave independence a radical meaning in Bahia. Bahia's Independence traces the history of the Dois de Julho festival in Salvador, the Brazilian state's capital, from 1824 to 1900. Hendrik Kraay discusses how the festival draws on elements of saints' processions, carnivals, and civic ritual in the use of such distinctive features as the indigenist symbols of independence called the caboclos and the massive procession into the city that re-enacts the patriots' victorious entry in 1823. Providing a social history of celebration, Kraay explains how Bahians of all classes, from slaves to members of the elite, placed their stamp on the festivities and claimed recognition and citizenship through participation. Analyzing debates published in newspapers - about appropriate forms of commemoration and the nature of Bahia's relationship to Brazil - as well as theatrical and poetic representations of the festival, this volume unravels how Dois de Julho celebrations became so integral to Bahia's self-representation and to its politics. The first history of this unique festival's origins, Bahia's Independence reveals how enthusiastic celebrations allowed an active and engaged citizenry to express their identity as both Bahians and Brazilians and to seek to create the nation they desired.

Robotics Software Design and Engineering is an edited volume on robotics. Chapters cover such topics as cognitive robotics systems, artificial intelligence, force feedback, autonomous driving embedded systems, multi-robot systems, a robot software framework for Real-time Control systems, and Industry 4.0. Also discussed are humanoid robots, aerial and work vehicles, and robot manipulators. This study focuses on the Brazilian Empire's Conservative Party and its success and failure in constructing a representative, constitutional monarchy to defend a slaveholding plantation

society. Historicamente, a quota legítima reservada aos herdeiros necessários, foi criada com o objetivo de proteger a família dos arbítrios do autor da herança, cumprindo, assim, com o dever de solidariedade inerente às relações familiares. Ocorre que, com a transformação que se operou no próprio conceito de família na atualidade, é necessário discutir qual espécie de família o ordenamento jurídico brasileiro pretende proteger através da proteção da legítima, arbitrada pelo Código Civil em cinquenta por cento do patrimônio do de cujus. Além disso, face à proteção dada aos direitos da personalidade, é imprescindível verificar se a solidariedade abstrata imposta pela lei ao resguardar parte da herança a determinadas pessoas é capaz de limitar a autonomia privada do autor da herança para dispor livremente dos seus bens para depois da morte. A presente obra visa, justamente, propor uma leitura atualizada acerca da quota legítima, demonstrando que da forma como atualmente encontra-se prevista no Código Civil, lesa não só os direitos do autor da herança, ao limitar sua liberdade de disposição patrimonial para depois da morte, como, também, os direitos dos próprios herdeiros ao estabelecer uma igualdade formal incapaz de promover seu pleno desenvolvimento, motivo pelo qual merece urgente reforma.

Journalism and the Media are the central issues of the fourth edition of *Electra*. In this file the french philosopher Yves Citton reflects upon the concept of populism; Cristina Margato interviews Joshua Benton, from Harvard University, about press constraints; Carla Baptista approaches the topic of fake news, the misinformation, the interests and the impossible regulation in the field of journalism; Barbie Zelizer, analyses the relation between crisis and journalism. This edition's interview talks to Alexander Kluge, an outstanding figure in German culture since the 1960s. The recent proclamation of Israel as a Nation-State of the Jewish people is the topic of the Diagonal section. Also in this issue, Samuel Beckett; Albert Einstein and Ludwig Wittgenstein; the city of Berlin by the German poet and essayist Durs Grünbein.

Cognitive impairment and dementia afflict a large number of people worldwide, being a major source of disability and loss of income. The amount of research on this subject is extensive, covering from basic to translational and clinical aspects. Therefore, it is hard to keep up with the amount of publications and novelties in this field, especially for the busy clinician. On the other hand, basic scientists often find it difficult to explore the vast clinical literature on this matter, as well as understand the clinical features of these disorders and to define the current research needs and directions. The main aim of this Frontiers Research Topic is to provide a solid and valuable platform of scientific synthesis regarding the current knowledge and literature on this theme, including clinical features, current and emergent diagnostic strategies, management (both present and future), and other important issues pertaining to cognitive impairment and dementia.

Gosta de literatura de temática LGBTQ+ mas não sabe o que ler a seguir? Procura um livro infantil ou juvenil sobre orientação sexual ou identidade de género para oferecer ao seu filho? Ouviu falar de um certo romance e quer saber mais antes de o comprar? Quer ficar a conhecer melhor um autor de que gosta muito? Gosta de história e quer saber quando foi escrito o primeiro romance queer de Portugal? Investiga sobre temática LGBTQ+ e pretende reunir bibliografia relevante? Poderá encontrar respostas a estas e a muitas outras questões nas páginas da 7.^a edição do Dicionário de Literatura Gay de Portugal, uma obra de referência inédita e indispensável, a primeira edição completa, de "A" a "Z", que conta com 1016 verbetes principais, bem como inúmeros verbetes temáticos e aquela que será talvez a primeira proposta

sistemática de uma cronologia da literatura LGBTQ+ de Portugal. Neste dicionário, ambicionamos incluir todas as representações LGBTQ+ da literatura portuguesa, englobando não só aquilo a que Eduardo Pitta chama literatura homossexual e literatura gay, mas também a literatura queer, bem como todas as referências literárias históricas associadas a questões de orientação sexual e de identidade e expressão de género, aquilo a que, em conjunto, designamos por literatura gay ou literatura LGBTQ+. Esta é a primeira edição completa do Dicionário de Literatura Gay, que inclui pela primeira vez todos os verbetes, de "A" a "Z". Os verbetes estão organizados por ordem alfabética e são dedicados a livros, revistas, autores, temas, personagens, livrarias, editoras, prémios literários ou outras referências da literatura LGBTQ+ de Portugal.

Today, switched reluctance machines (SRMs) play an increasingly important role in various sectors due to advantages such as robustness, simplicity of construction, low cost, insensitivity to high temperatures, and high fault tolerance. They are frequently used in fields such as aeronautics, electric and hybrid vehicles, and wind power generation. This book is a comprehensive resource on the design, modeling, and control of SRMs with methods that demonstrate their good performance as motors and generators.

Iniciação à liturgia faz parte da coleção "Pastoral Litúrgica" que parte da reforma realizada pelo Concílio Vaticano II. As obras refazem o caminho de como somos transformados pelo mistério que celebramos. Vamos redescobrir a centralidade da Páscoa na história da salvação e na celebração litúrgica. Os livros da coleção apresentam grande sensibilidade pastoral e excelente fundamentação litúrgica. Quando chegamos à casa de Deus, um turbilhão de sentimentos nos invade. Queremos entrar no mundo dos ritos e dos símbolos, conversando familiarmente com o Pai, sem nos sentir estranhos ou tomados de temor. Só tem sentido entrar no mundo da celebração litúrgica porque fomos enxertados em Cristo. Pelo Batismo, fomos iniciados no mistério da morte e ressurreição de Jesus. Somos

habitados pelo Espírito, formamos o corpo de Cristo, a sua Igreja, o que nos eleva à condição de sacerdotes para realizar o culto de glorificação com a oferta de nossa própria vida. Claudio Pastro, um dos autores, nos oferece o mapa do lugar do culto. Por meio da configuração do templo sagrado e da disposição dos seus elementos internos, traça o itinerário espacial que nos conduz ao coração do mistério. Vamos da fonte batismal ao altar do banquete.
